

Fred on the Economy

Fred Thompson is, in his own words, “bringing you a little holiday cheer in the form of some good news about the economy.” Unfortunately this statement is laced with sarcasm!

In this video Fred explains how the financial crisis was brought about by irresponsible spending by the U.S. Government who proposes to fix the problem by encouraging more irresponsible spending! As you listen to Fred it is difficult to understand how anyone could see merit in the Government’s plan.
