

Global Warming: The Other Side

John Coleman is an American TV weatherman noted for, along with entrepreneur Frank Batten, founding The Weather Channel.

In January 2010, Coleman produced a special report for KUSI-TV, entitled Global Warming: The Other Side, in which he forwards his view on Global Warming as a scam -- and lays out what he believes to be evidence of a deliberate manipulation of world temperature data by NASA and others.

Click the link below to view the five segments that make up this great special report.
