

Kyotoism

The Letters Editor,

Carbon-dioxide is a clear, odourless gas necessary to all life on earth.

Australia fully signed the Kyoto protocol under the Rudd Labor government. It is an agreement that limits a countries production of supposed greenhouse gases, namely carbon-dioxide and methane.

Article 3.7 of the Kyoto protocol allows nations to treat reduced land clearing as a greenhouse gas emission reduction.

The illogical Kyoto carbon-dioxide limitation targets have recently been achieved by locking up an estimated 19% of the entire land area held by citizens PRIVATELY throughout Australia via Native Vegetation Clearing Bans.

The USA and China remain outside the Kyoto protocol.

The Kyoto protocol is now up for renewal as an extension.

On December 1, 2010 Japan has this to say when asked to sign the extension to the Kyoto protocol: " Japan will not inscribe its target under the Kyoto protocol on any conditions or under any circumstances." And today Japan says "We will not change our position. We don't change, we haven't changed, we will not change."

The Kyoto protocol is an unconstitutional attack on our rule of law and private property rights. By signing and accepting the Kyoto protocol our leaders were negligent in their critical job of protecting Australian's private property from internal and external thugs.
