

Good Afternoon,

Per the below article where today and AGAIN the Australian people are asked for a Carbon taxation/limiting initiative:

The propaganda emanating from Canberra, the ABC which includes the SBS and the CSIRO condemning carbon dioxide as a pollutant cannot be backed up by independent scientific investigation anywhere.

Industrial man's contribution to the amount of CO2 in the atmosphere is, according to the UN's IPCC 3%.

Australian industry's contribution is so small it can scarcely be measured.

The rush to install a Carbon Tax cannot be described as anything but treason against the population of the Australian Nation.

The Politician's advocating and supporting a carbon tax ought to be aware that there are severe penalties for treason from which no politician or bureaucrat is immune.

In our history, many seemingly omnipotent governments have been brought to account for corruption.

It is helpful to remember that during times like these, there have always been times like those.

Remember Christine Milne on the 7.30 Report? ".....we want to see a carbon price as quickly as possible because we want transformation of the whole economy and society." No wonder she is agog with happiness.

What this philosophical blank page really means, is that the Greens will transform Australia into the United Socialist States of Australia.

The Carbon Tax must be rejected in its entirety by the main parties and by any AUSTRALIAN. One cannot vote for any AUSTRALIAN who could concede that a Carbon Tax should be inflicted upon other AUSTRALIANS.

Let's hope an election is imminent.

Regards,

Mac Nichols
Mining Engineer
