

Dear Uniting Justice

Dear Elenie

I notice with increasing concern the correspondence between yourself and my wife, Lily.

We all care deeply for God's precious creation and Lily and I have avidly followed both sides of the argument. Al Gore and others have criminally promoted a false scare, and who knows how many young impressionable people have lost hope and suicided after watching his fear-filled film and listened to his 'disciples'. Yes, this self-appointed 'deity' uses the term 'disciples' for members of his brain-washed 'army' and he had the temerity to come into Australia with his team to interfere with our country's politics to help Kevin Rudd's election to ensure the soon-to-be-infamous Kyoto Protocol was signed.

My immediate concern is with your attitude to the huge hoax being perpetrated worldwide, a hoax which can impoverish the western world and render us helpless to assist poor people.

Prosperity is the answer to pollution. Carbon dioxide is not a pollutant, it is the key to prosperity, It is a plant fertiliser, and we need plants to flourish to feed the growing population.

As for you claiming to follow 'the best science', as some wise person has observed 'if a million men say a foolish thing, it is still a foolish thing'. You can continue to march down the yellow brick road of smoke and mirrors or you might check the splendid work of the Galileo Movement <<http://www.galileomovement.com.au/>>. This was established not by the 'big polluters' (who have been falsely labeled and who happen to provide us with cheaper and more efficient goods and services than any command society could possibly provide), but by concerned and well-read citizens who are spending their own savings to help make this a better country, and inspire the world to do likewise.

To me, George Pell is a hero for standing up for Truth.

I hope there will be more conversation between us, as Truth must be tested continually. In your position, you have an obligation to those you represent to prove you are properly and truthfully serving them. Please let me know if I am missing something.

Regards

John McR
